March 5, 2019	●	Web Design Technology 10th La Union Provincial Skills Olympics 2019

EXPERIENCES

- **Frontend Developer (2022-June 2025) Contract**
  Frontend: Svelte/Sveltekit, DaisyUI, TailwindCSS
  Backend: Storefront, Shopify GraphQL, Knex.js, PostgreSQL, Drizzle ORM, Supabase

  Company: Pilothouse Digital
  1011 Government St, Victoria, BC V8W 1X6, Canada

  1. Contribute to a Headless CMS E-commerce solution for Shopify stores, managing backend migrations and services.

     - Incorporated an AI feature to generate a component store, utilizing Svelte-based components and Tailwind CSS for styling.

     - Convert the Liquid-based Shopify store into a modern JavaScript framework using SvelteKit for a lightweight and high-performance site.

     - Developed a robust drag-and-drop functionality for seamlessly adding modules to site pages, including the homepage, collection pages, and product detail pages (PDP).

     - Created multiple modules (components) for a store template, enhancing the homepage, collection pages, and product detail pages (PDP).

     - Implemented comprehensive cart functionality using Svelte, integrating Shopify's Storefront GraphQL API to streamline data mutations.

- Established template theming with DaisyUI to bolster store branding.

- Integrated third-party Shopify libraries, including Rebuy for upselling functionalities and various review APIs.

- Designed and executed modules/component tests using vitest.

- Formulated storefront GraphQL queries and mutations for headless CMS architecture.

2. Convert Liquid-based Shopify store into modern Javascript framework using Nuxt/Vue

- Initiated converting shopify liquid base and pixel-perfect design conversion for the site using Nuxt and Storefront GraphQL

Fullstack Developer (2021-2022) Fulltime
Frontend: React/Next.js/Material UI & Vue/Vuetify
